

BLACK IS BACK

ABOUT ACCOYA®

Accoya is the world's leading high technology wood. It is produced from sustainably sourced, fast growing softwood using a modification process, improving the wood from the surface to the core. The result is a non toxic, durable, stable and beautiful material with industry-leading environmental credentials.

A new world of sustainable and low maintenance products including windows, doors, decking and cladding is available using Accoya. The exceptional durability provides for a minimum 50 year above ground and 25 year in-ground life.

Accoya is tried and tested in North America since 2007 and ICC approved for US building code in ground contact and termite zones.

MEDITE TRICOYA EXTREME

ABOUT TRICOYA EXDF

Tricoya EXDF is a high performance, wood based panel product. It demonstrates outstanding durability and dimensional stability in the most extreme and challenging environments - both exterior as well as interior, wet and high moisture applications. The product uses proprietary acetylated wood technology and a modified fibreboard manufacturing process to create a wood panel product with outstanding durability and stability.

DARK COATINGS

Generally problems occur with dark coatings on wood, due to shrink and swell being exasperated by the solar gain, especially in high UV-regions across the globe. Accoya and Tricoya's superior dimensional stability negates this problem and maintenance intervals are dramatically extended.

Dark or black coated Accoya and Tricoya have been a popular choice with architects worldwide with several coating brands. These projects have been performing with time without the issues usually associated with other wood species and wood panel types.

ACCOYA® LUMBER AND TRICOYA® PANEL BENEFITS

50 YEAR WARRANTY

DIMENSIONALLY STABLE

LOWER MAINTENANCE COSTS

ENVIRONMENTAL EXCELLENCE

IDEAL FOR COATING

ROT & INSECT RESISTANT

RECYCLING CENTRE (NL)

Project: Onder Driehoeken Recycling Centre in Veenendaal, The Netherlands
Date: August 2011
Finish: Fine sawn Accoya with 3 layers of Sansin black stain
(the first two applied industrially and one layer on site)

PRIVATE HOUSE (NZ)

Project: New Zealand
Date: May 2013
Finish: Accoya with black stain

SCHOOL (UK)

Project: Netley Primary School in London, United Kingdom
Date: 2014
Finish: Accoya with Sikkens primer WP567 and top coat WF791

CHURCH (NL)

Project: Church for the Apostolic Society in The Hague, The Netherlands
Date: January 2010
Finish: Fine sawn Accoya with Sansin black stain

PRIVATE HOUSE (AUS)

Project: Australia
Date: 2011
Finish: Fine sawn Accoya with 3 layers of Sikkens Cetol stain applied on site.

PRIVATE HOUSE (NL)

Project: Ooze Villa in Rotterdam, The Netherlands
Date: 2010
Finish: Rough cut Accoya with Sansin black stain

Accsys is a chemical company focused on the acetylation of wood. The company operates four wholly owned subsidiaries including a commercial scale Accoya wood facility in the Netherlands, and offices in the Netherlands, USA and UK. Accoya wood has been produced by Accsys in the Netherlands continuously since 2007. Volume has grown each year and it is now sold through distribution and selected partners around the globe.
